SUMMARY

Software Engineer with full-stack development experience, specializing in building scalable web applications using React, Next.js, JavaScript, Ruby on Rails, and PostgreSQL. Experienced in developing RESTful APIs, implementing authentication and role-based access control, and maintaining production-ready applications. Currently working in a front-end-focused role while continuing to contribute across the stack using MERN STACK and modern web technologies. Recently contributed to the integration of an AI-powered automation tool (AI Wizard V1) that streamlines brand and SKU creation workflows within a production platform. Strong problem-solving skills with an emphasis on clean code, performance, and long-term maintainability with a goal of advancing research and technical expertise through graduate studies in Data Science and Software Systems.

EDUCATION

Bachelor In Information Technology 2021 - 2025
University Of Gujrat 3.56 CGPA

PROFESSIONAL EXPERIENCE

- Front End Engineer** Sep 2025 - Present
- Developed and maintained scalable web and web-based mobile applications using modern JavaScript frameworks.
 - Migrated and Refactored legacy code to improve codebase modularity, performance, and maintainability.
 - Collaborated with cross-functional teams to design and deliver new platform features and integrations.
 - Integrated third-party APIs to enable seamless data exchange between systems.
 - Developed and integrated a fully functional **folder-based management system** with a new table view and advanced filtering capabilities.
 - Implemented drag-and-drop functionality for folders and items (files), replicating real-world file management behavior for improved user experience.
 - Contributed to the integration of **AI Wizard** V1 and V2, automating the Platform Initial creation process.
- Ruby On Rails Developer** Dec 2024 - Sep 2025
- Developed expertise in Ruby on Rails by building full-stack projects with PostgreSQL, Devise, CanCanCan, and RESTful APIs. Gained hands-on experience in MVC architecture, authentication, Query Optimization and deployment through real-world applications.

TECHNICAL SKILLS

Front-End:

- JavaScript, Python, TypeScript, RTK
- HTML, HAML, CSS, React Js, NextJs
- TailwindCss, MUI, Ant Design, Shadcn

Back-End:

- NodeJs, ExpressJs, NumPy, Pandas, Matplotlib, Ruby On Rails , Devise, CanCan, Rolify
- MongoDb, PostgreSql, GraphQL

Tools

- Linux, Git, GitHub
- Postman
- Figma

PROJECTS

Orijinplus Global (<https://www.orijinplus.global>)

Sep 2023 - Present

- It's a international Connected Packaging Platform that empowers F&B businesses with a suite of digital tools to better inform, connect and reward offline consumers directly from their packaging.
- My role in this project involves the development, Upgradation, integration of new features and maintenance of the Web and Web-Base Mobile application.
- Recently Integrate their AI Wizard @V1 and @V2 that automates their Initial Brand and SKU's Creation.

Gujrat Chamber of Commerce & Industries (GTCCI/GTWCCI) – SaaS Membership Management System

April 2025 - Sep 2025

- Developed a full-stack SaaS platform for online membership registration and management (Web + API for Mobile App). Implemented role-based authentication, permissions, and membership history tracking.
 - Built document upload with unique key generation and collaborated with mobile developers for API integration.
- Tech Stack: Ruby on Rails, PostgreSQL, Devise, CanCanCan, Pagy, Git/GitHub

Tourism (Tour & Travel)

June 2025 - Sep 2025

- Designed and implemented a full-stack web application for managing tours, packages, and tourists.
- Integrated role-based authentication, permissions, and secure data access.
- Added tour history management and collaborated with other developers for smooth feature delivery.
- Tech Stack: Ruby on Rails, PostgreSQL, Devise, CanCanCan, Pagy, Git/GitHub

ADDITIONAL INFORMATION

- Languages: English, Urdu
- Certifications: Programing with Javascript , Introduction to Front-End Development , Intermediate React Js, Intermediate NextJS.
